

ISOPAR™ SERIES ISOPARAFFINIC HYDROCARBONS

Isopar is the brandname for our range of isoparaaffinic fluids. Isopar fluids are manufactured under special conditions to ensure batch-to-batch uniformity and to eliminate unwanted impurities, such as aromatics, unsaturated olefins and reactive polar compounds. The high degree of purity, combined with the relative inertness of the saturated isoparaaffinic structure, minimizes or eliminates adverse reactions in industrial processes and consumer applications.
